PROFESSIONAL PROFILE

I'm a fullstack software developer, and technical writer. I build industry standard products that solve everyday problems, with an emphasis on user experience, accessibility and performance.

CORE COMPETENCIES

- Frontend Development (React, Next.js, Tailwind CSS, Typescript, JavaScript)
- Ethereum Blockchain Development (Solidity, Ethers, Web3.js, WAGMI)
- Backend Development (Node.js, Express, MongoDB, Postgres, Supabase)
- Mobile App Development (React Native, Expo Go)
- Testing (Jest, React Testing Library)

PROFESSIONAL EXPERIENCE

Korrek Games | Frontend Developer

October 2024 - March 2025

korrektgames.com

- Developed and implemented responsive UI components using Next.js, TypeScript, and Tailwind CSS based on detailed Figma designs.
- Ensured pixel-perfect frontend alignment with design specifications through advanced styling and layout techniques.
- Optimized component performance and rendering for a smoother user experience across devices.
- Maintained a clean, scalable codebase and followed best practices for component reuse, state management, and accessibility.

Iteration, Ontario CA | Full Stack Software Developer

August 2024 - March 2025

ecosafesense.com

- Co-led the agency's technical operations, building responsive web and mobile apps using React, Next.js, React Native, and Node.js.
- Integrated third-party services (e.g., Stripe, Firebase, OpenAI) to extend app capabilities and streamline client workflows.
- Deployed full-stack applications to Vercel, Render, and Firebase with custom domain setups and CI/CD pipelines.
- Maintained and optimized codebases for performance, security, SEO, and scalability across multiple client projects.

EcoSafeSense Canada | Software Developer

October 2024 - January 2025

ecosafesense.com

- Contributed to the development of a web-based monitoring dashboard integrated with a 3-layer IoT cloud architecture for real-time air quality analysis.
- Implemented frontend and backend features enabling real-time data visualization from distributed air quality sensors.
- Ensured accurate graphical display of sensor data and environmental recommendations by integrating real-time API endpoints and data streams on the dashboard.

Maritime Canada | Software Developer

November 2024 - January 2025

maritimeriot.ca

- Improved UI performance and responsiveness of Maritime Riot's mobile app using React Native and Expo.
- Implemented functional Haversine distance calculation between users and event locations.
- Refactored and optimized existing codebase for better maintainability and performance.

Fyre Skin | Website Manager & SEO Specialist

April 2023 - September 2023

fyreskin.com

- Improved UI performance and responsiveness of Maritime Riot's mobile app using React Native and Expo.
- Implemented functional Haversine distance calculation between users and event locations.
- Refactored and optimized existing codebase for better maintainability and performance.

EDUCATION & CERTIFICATIONS

- Ethereum Blockchain Developer Bootcamp With Solidity (2025)
- Responsive Web Design - FreeCodeCamp
- Technical Writing Certification - AptLearn
- Introductory Internet/Cyber Security Certificate - AptLearn
- Software Engineering - 100Devs Agency
- B.Sc Microbiology - University of Ilorin
